REPORT OF THE SUPERINTENDENT OF SCHOOLS

To The Greenfield School Board:

In 1927-1928 Greenfield was the 110th town in point of current cost per \$1,000.00 of equalized valuation out of 244 districts. In other words it was exceeded by 134 other districts. In 1928-1929 the current costs for public education in Greenfield on the basis of her wealth were exceeded in ratio by 148 other school districts. Greenfield has dropped from the 110th to the 96th position.

Repairs and repainting have made the two school rooms delightful and the children's eyes are no longer strained for lack of illumination on dark days. Adequate posture furniture is being added at a rate of about one-sixth of the actual need reported each year. Continuance of this policy will mean that in four years more Greenfield will have both rooms equipped with correct posture furniture.

We call the attention of the Board to the extensive use of the radio, more particularly now that strictly educational programs of all types are available to add interest to the regular routine programs of the school. The extent to which radio is being used elsewhere than in New England is exceedingly gratifying. Visual Education is at last winning its way through even the most conservative school systems.

No change has been made in the technique of standardized testing and reporting. The actual status of any child is available at any time for your consideration, not only teacher estimate but upon a basis of comparison with other superior schools throughout the country. The records established by the Greenfield children warrant the continuance of your thoughtful and progressive attitude toward education.

(Signed)

LAWTON CHASE
Superintendent
